PERFECTING THE IDEAL

Gorey

Glass door panels with digitally printed design are absolutely unique and offer almost endless possibilities to play with colours and patterns. You can either choose from our wide range of products or else just share your ideas with us and we will do our best to transform your imagination into reality and produce a special glass panel tailor made just for you!

Our full glass panels really stand out thanks to the new innovative technology combined with a beautiful design we managed to incorporate into our new product line and as a result we are proud to say that our panels have very good insulation properties ($U = 0,6 - 1,1 \text{ (K.m}^2\text{)/W}$).

The background of the cover is a deep purple gradient. Overlaid on this are several translucent, flowing shapes in shades of pink and magenta, resembling smoke or liquid. A delicate spider web is visible in the upper right quadrant. A vertical, brushed metal rod runs down the left side of the cover, with a horizontal crossbar near the top. The text is in a white, serif font.

09. TRENDING

Kinvara

Our Glass panels have excellent insulation properties ($U = 0,6 - 1,1$ (K.m²)/W).

Our doors are also environmentally friendly, 96% of the used materials are fully recyclable and environment friendly.

10. NEW

Lullymore

Door panels have direct influence on the entire life of your door, not only because of the aesthetics but they also soundproof and thermal insulation from your home from the elements.

Other important features when choosing the right panel include low thermal expansion, high mechanical resistance, strength and durability of the used materials.

When all combined together, the final product represents exceptionally high level of safety, outstanding quality, unique and timeless design typical for this product line.

11. BEST SELLER

Tarbert
